

Photo shows an RGB Browning II design custom built for an individual RGB homebuyer and may show optional features which vary from the standard plan. Refer to the floor plan for standard plan features which you may customize to make your new RGB home everything you want it to be.

## The Browning Design

This 4-bedroom, 2 1/2 bath home invites you to enjoy substance and style on a grand scale, starting with the 2-story pillared entry and traveling through generously proportioned sun-filled rooms where volume ceilings, an overview balcony, a family-room fireplace, and transom glass will showcase your home decor. The kitchen's bountiful cabinetry and countertops compliment the dining/family room combo that caters to

gatherings of any size — while architectural columns define the formal dining room without confining traffic flow, views or space. Three bedrooms invite the flexible use of the first floor bedroom as guest quarters or a computer room den — while your own personal suite is privately situated to be as a quiet retreat with a relaxing soaking tub, separate shower and a walk-in dressing-room closet.

Look for the name brands you know mean quality, and check out RGB Quality Building Features at [www.RGBhomes.com](http://www.RGBhomes.com)
